VIRTUAL FUTURE TECH BOOTCAMP vom 26.6. bis 2.7.2020

IoT Train System *featuring the*
Sense2GoL radar sensor

Engage in both **collaborating with Infineon and Thales Austria professionals** and **peer-to-peer learning**!

*

Access a large pool of **resources** and get post-session **support for integrating project code into your home application and installations**!

*

Be part of the project **team**, present your results at the **BEST OF #IMM2020-EVENT** and make the first Virtual Future Tech Bootcamp a success!

<u>**ARE YOU ...**</u>

... adamant about problem solving and finding the "missing link"?

... looking to learn about the industry at first hand?

... a student having already worked on IoT-related projects and therefore knowing what tasks of the project you like to tackle?

... having experience in an area that profits this projects but doesn't show up on our radar?

... bringing experience in working with Matlab, Python, RTOS or Qt?
